DETERMINING YOUR INVESTOR PROFILE AND INVESTMENT OBJECTIVES

The first step in the Asset Management Process is to determine your investor profile. This profile will help define important factors such as your investment objectives, time horizon, and your attitudes toward investing.

This profile will help build the base of information needed for you to progress to the next step in the asset management process – the development of an appropriate asset allocation policy.

To complete this profile, answer each question by circling the number in the right hand column that best matches your personal situation. Remember to answer the questions according to your investment objective (i.e.) retirement savings, education funding, wealth accumulation or preservation.
